

achromatize™

lanterna™

live in your best light™

Lanterna™ is a patent-pending cosmeceutical formulation containing 3% deoxyArbutin (Tetrahydropyranyloxy Phenol).

deoxyArbutin is a patented cosmetic ingredient clinically proven to improve the appearance of skin pigmentation. With continued use, skin tone appears more even, brightened, and age spots, freckles, and other skin imperfections are less noticeable. deoxyArbutin has been extensively studied for both safety and efficacy and can be used on all skin types.

Lanterna is

- Safe and effective on all skin tones.
- Clinically proven to provide a 30% or more reduction in the appearance of age spots and skin discoloration.*
- Clinically proven to provide a significant improvement in the appearance of tanned skin, unlike the leading prescription product for skin discoloration.**
- 10x more effective than the leading prescription product.***
- 100% of women tested noticed a significant improvement in skin brightness, evenness and overall skin tone.*

* Based on a 12 week clinical trial of 50 panelists, dosed once daily with a formulation containing 1% deoxyArbutin. ** Based on a 5 week clinical trial of 25 panelists, dosed once daily 3x per week with a formulation containing 1% deoxyArbutin. Tanning induced by UV irradiation prior to study. *** Based on *in vitro* laboratory tests. These statements have not been evaluated by the FDA. This product is not intended to diagnose, prevent, cure or treat any disease. This image is a dramatization of the effects. Individual results may vary.

age spots
café au lait spots
freckles
liver spots
melasma
mottling
pigmented spots
post-inflammatory
or post surgical
hyperpigmentation
solar lentigens
uneven skin tone

Frequently Asked Questions

How soon will I see results?

Skin takes approximately one month to complete a turnover cycle. Results can be seen in approximately one to two months, with continued improvement in appearance in subsequent months.

Can Lanterna be used outdoors, in direct sunlight?

Exposure to direct sunlight causes increased melanin production (tanning). This will diminish the effects of Lanterna. Sunscreen is recommended.

Will there be any more products in the Lanterna line?

Yes. We are actively researching adding to the line. Your feedback is greatly appreciated.

Where can I buy Lanterna?

Lanterna can be purchased through the Lasyainc.com website, as well as through select dermatologists. If you would like it to be available through your dermatologist, or local cosmetic chain, please submit a request to the website, providing all necessary contact information. Wholesale/Distribution inquiries may contact Lasya, Inc. directly at **1-855-24LASYA.**

What does Lasya mean?

Lasya (lā zh ə) is the Tibetan Goddess of Beauty and Dignity of the Body. Normally depicted wearing white and carrying a mirror, she obtains her power from the light of the sun and of the moon. The management team of Lasya, Inc. has a combined total of over eighty years of skin science research and product development experience. As a company, Lasya, Inc. is committed to bringing safe and effective skin care products to the market and to the people who need them.
